LABELING SYSTEMS CATALOG

FEATURES EQUIPMENT, SOFTWARE AND LABELS

A new 32-page catalog that features labeling, barcoding, data collection systems and consumables for virtually all industries is being offered by Industrial Labeling Systems Corporation of Chelmsford, Massachusetts.

The ILS Labeling, Barcoding, Data Collection Catalog provides a comprehensive selection of products that includes label printing systems, automated print and apply systems, barcode and RFID data collection solutions, custom and stock labels in several substrates, and a variety of ribbons. Most important are labeling assistance guides, specifications, an offering of technical services, and several handy forms for requesting information.

Developed for end-users, resellers, and systems integrators, the 32-page ILS Labeling, Barcoding, Data Collection Catalog was designed to let readers select the products they need, ranging from simple stock paper labels to the full implementation of a custom barcode or REID based data collection system linked to host accounting, MRP, or ERP software. These products are suited for electronic, industrial, medical, pharmaceutical, and other applications.

The ILS Labeling, Barcoding, Data Collection Catalog is available free from: Industrial Labeling Systems Corp. 10 Kidder Rd. Chelmsford, MA 01824.
