VICOR RECOGNIZES INDUSTRIAL LABELING SYSTEMS FOR ENGINEERING EXCELLENCE

CHELMSFORD, MA – March 2009

During the 2009 Vicor Supplier Day held on Thursday, March 19, 2009, Industrial Labeling Systems, Corporation was recognized by being awarded the **“Outstanding Contribution Award for Engineering Support”**.

The event was intended for Vicor’s key suppliers in order to recognize achievement and share goals, objectives, and initiatives for the coming year. Factory tours and presentations on the strategic partnership between Vicor and select group of suppliers were followed by the presentation of awards to a few companies including Industrial Labeling Systems.

Vicor designs, manufactures, and markets modular power components and complete power systems used primarily by original equipment manufacturers (OEMs) in the communications, data processing, industrial controls, test equipment, medical and defense electronic markets. At the heart of Vicor's product line are high density DC-DC converters that come in thousands of combinations of input voltage, output voltage, and power levels. Engineers use the combined advantages of Vicor component power and accessory components to create compact, highly functional, economical products with streamlined development cycles that minimize time to market.

“We are very happy to be selected among more than 200 suppliers Vicor has. This award demonstrates the commitment Industrial Labeling Systems has to technical excellence as well as outstanding customer service” said Claudette Flynn, Strategic Account & Inside Sales Manager.
