Teklynx International Announces Recognition of Industrial Labeling Systems as a Teklynx Certified Integrator Partner

MILWAUKEE (July 25, 2000) -- Teklynx International, the world's leading developer of software products for the AIDC marketplace, announced today that Industrial Labeling Systems Corp., **a bar code labeling and data collection hardware and software solutions integrator** located in Chelmsford, MA, has successfully completed the Teklynx Certified Integrator program. The program is designed to benefit specialized integration providers. To qualify as a Teklynx Certified Integrator Partner, an integrator must demonstrate proficiency in developing and/or integrating AIDC and output management software solutions and/or demonstrate expertise in specific niche specialties. Additionally, successful completion of a rigorous system engineer certification training program, including successful testing of new skill sets is also required.

As a Teklynx Certified Integrator Partner, ILS will now benefit from Teklynx's years of experience in developing the world's best-selling label design software packages - CODESOFT™ and LABELVIEW™; the world's most complete family of host distributive solutions - SENTINEL™; and the industry's most flexible data collection software offerings - EZTRAK™ and GENSCAN™.

The certification of ILS provides Teklynx with a team of experts who cost-effectively deliver the technology, integration, and support to a wide array of industries. **"Industrial Labeling Systems is very happy to take another step in solidifying its alliance with Teklynx International. ILS' certification with Teklynx, coupled with our many years of solutions expertise, allow us to provide a more complete software based solution to end users for their bar code labeling, printing, and connectivity needs,"** added Serhat Kotak, Vice President of Sales, Marketing and Technical Services for ILS, Corp.

"The Teklynx product suite is the perfect complement to ILS' expertise in systems integration and data solutions," said Kurt Simons Director of Sales at

Teklynx International. "With their certification, ILS can now offer their customers easy-to-use and cost effective software solutions for printing bar codes from any ERP or WMS system."

Industrial Labeling Systems, Corp., based in Chelmsford, MA, is a leading software developer and a solution provider to labeling and bar coding applications. The company is a total solution provider, supplying labels and ribbons along with bar code printing systems, customized data collection systems, print-apply systems as well as custom software to match the customers needs. In addition, they are a systems integrator of labeling and bar coding hardware and software, and also have custom label manufacturing capabilities.

Teklynx International is the leading software developer of automatic identification and data collection (AIDC) products including software for label design, host connectivity, and information and data management. Over 200,000 companies in 120 countries rely on our integrated software products for such applications as receiving, inventory management, product identification, product control and shipping. The company is headquartered in Milwaukee with operations in the United States, Europe, Asia/Pacific, and Canada. More information on Teklynx International is available at www.teklynx.com.
