For Immediate Release

Label Printing System
Approved by U.S. Army for UID Labels

Chelmsford, MA - Industrial Labeling Systems, Corp., a leading software developer, value added reseller and a systems integrator of labeling, barcoding and data collections systems, has announced that the U.S. Army has purchased eight of their ULTIMATE 3460XT 600DPI Thermal Transfer Printers and software as "bundled" solutions for UID label printing.

The ULT-3460XT 600 DPI Thermal Transfer label Printer and Software meets MIL-

STD-130 requirements for UID (unique identification) Labels featuring a single two-dimensional barcode. Suitable for any military supplier, this versatile system can perform all types of barcode printing and is designed to operate seamlessly with any manufacturing operation.

Featuring flexible, menu-driven software that can custom design an entire UID label, including serial number, date stamps, and other critical data, the ULT-3460XT 600 DPI Thermal Transfer Label Printer and Software can access databases, connect to the host ERP and manufacturing systems, and accept a wide range of label substrates.

The ULT-3460XT 600 DPI Thermal Transfer Label Printer and Software are priced from $3,395.00. Label samples and literature are offered on request.
